Chapter 2: Section 2 Notes-Electric Currents

As you read, answer these questions. This is a modified type of Cornell Note Taking. Include the page number of where the material is found.

1. What is the rate of electric current? (Page _____)	
2. What unit is used for rate of current? (Page _____)	
3. What is an electric current? (Page _____)	
4. Think of other examples of closed loops.	
5. What is an electric circuit? (Page _____)	

Summary: Write in your own words **three or more sentences** that describe what you have learned on the flow of electric charges.

Objective:
